American Public Attitudes on Race, Ethnicity, and Religion

Survey Methodology

The survey was carried out May 6-16, 2022, online from a nationally representative sample of Nielsen Scarborough's probability-based panel, originally recruited by mail and telephone using a random sample of adults. The national poll was conducted among 2,091 respondents, with a margin of error of +/- 2.14%. Overall, the sample was adjusted to reflect population estimates (Scarborough USA+/Gallup) for Americans. The survey variables balanced through weighting were: age, gender, race/ethnicity, household income, level of education, census regional division, and political party affiliation.

Note: These questions were fielded as part of a larger poll on foreign and domestic issues. Participants in this study were provided by Nielsen from Nielsen's sample of respondents.
