

CRITICAL ISSUES POLL

With Ipsos

Sibley Telhami, Director

American Public Attitudes on Israel/Palestine

Survey Methodology

The survey was carried out June 21-27, 2023 among 1,439 respondents, with a margin of error of +/- 2.9%. The survey was conducted using Ipsos' KnowledgePanel®, a probability-based online panel designed to be representative of the U.S. population. Initially, participants are chosen scientifically by a random selection of telephone numbers and residential addresses. Persons in selected households are then invited by telephone or by mail to participate in the web-enabled KnowledgePanel. For those who agree to participate, but do not already have Internet access, Ipsos provides at no cost a laptop/netbook and ISP connection. People who already have computers and Internet service are permitted to participate using their own equipment. Panelists then receive unique log-in information for accessing surveys online, and then are sent emails throughout each month inviting them to participate in research.

Note: These questions were fielded as part of a larger poll on foreign and domestic issues.

Q13. If a two-state solution to the conflict between Israel and the Palestinians were not possible, meaning the West Bank and Gaza had to be under Israeli control indefinitely, which of the following would be closer to your view?

	Rep	Dem	Total
