Shibley Telhami, Director

American Public Attitudes on the Ukraine War (Round 6)

Survey Methodology

The survey was carried out June 21-27, 2023 among 1,439 respondents, with a margin of error of +/- 2.9%. The survey was conducted using Ipsos’ KnowledgePanel®, a probability-based online panel designed to be representative of the U.S. population. Initially, participants are chosen scientifically by a random selection of telephone numbers and residential addresses. Persons in selected households are then invited by telephone or by mail to participate in the web-enabled KnowledgePanel. For those who agree to participate, but do not already have Internet access, Ipsos provides at no cost a laptop/netbook and ISP connection. People who already have computers and Internet service are permitted to participate using their own equipment. Panelists then receive unique log-in information for accessing surveys online, and then are sent emails throughout each month inviting them to participate in research.

Note: These questions were fielded as part of a larger poll on foreign and domestic issues.
