

## **Methodological Note on Latino Sample**

The total Latino sample in this survey, out of the total sample of 2,138, was:

Unweighted Latinos: 153 (7.2%)

Weighted Latinos: 327 (15.3%)

The whole data set was weighted on the following variables: age, gender, income, education, race/ethnicity, and geographic region. Latinos were not weighted on any additional variables.

The Latino sample was weighted to represent the total U.S. population of Latinos.

This survey was conducted in English only and was conducted online.
