## **Possible Jeffrey Epstein Links to Foreign Intelligence**

---

### **Survey Methodology**

This poll was conducted by Ipsos from November 14-16, 2025, using the probability-based KnowledgePanel®. This poll is based on a nationally representative probability sample of 1,017 adults age 18 or older. The survey was conducted using KnowledgePanel, the largest and most well-established online probability-based panel that is representative of the adult U.S. population.

The study was conducted in English. The data for the total sample were weighted to adjust for gender by age, race/ethnicity, education, Census region, metropolitan status, and household income. The demographic benchmarks came from the 2025 March Supplement of the Current Population Survey (CPS). Party ID benchmarks are from the 2025 National Public Opinion Reference Survey (NPORS). The margin of sampling error is plus or minus 3.2 percentage points at the 95% confidence level, for results based on the entire sample of adults. The margin of sampling error takes into account the design effect, which was 1.06.
